Paris, July 23rd, 2025

SUEZ and RATP Group join forces to accelerate the shift towards sustainable urban mobility through a power purchase agreement

SUEZ and RATP Group announce the signing of a long-term renewable energy purchase agreement – (PPA). Under this agreement, SUEZ will supply RATP Group — the world's third-largest urban transport operator — with almost 100 GWh of renewable electricity per year, generated from the recovery of household waste. The contract will last for a maximum of 16 years.

This new long-term renewable energy purchase agreement aligns with the energy and climate policy of RATP and its subsidiaries, which are committed to enhancing the energy and carbon efficiency of their activities. A significant milestone in the energy performance strategy was reached in 2017 when RATP became the first multimodal operator to be certified ISO 50001 for energy management across all the activities. Since then, the certification has been successfully renewed.

RATP also aims to reduce by 43% its energy-related greenhouse gas emissions by 2027, compared to 2019 levels. This commitment has been validated by the Science Based Targets Initiative and confirms that RATP's climate objectives align with the Paris Agreement's most ambitious target of limiting global warming to 1.5°C.

Also, this Power Purchase Agreement with RATP is part of SUEZ's strategic plan to support companies in their energy transition. Starting in 2026, SUEZ will supply renewable energy produced by its waste-to-energy plants in France, several of which are located in the Île-de-France region. This energy will power the various activities of RATP Group and its subsidiaries (operation, maintenance, energy supply to stations and terminals, etc.) and reduce their carbon footprint.

As France's leader with 34 waste-to-energy plants recovering more than 3.5 million tons of waste per year to produce local energy, SUEZ implements technologies on sites to optimize energy efficiency and reduce carbon footprint, while supplying its partners with recovered energy. This third PPA emphasizes SUEZ's commitment to accelerating the production and supply of energy recovery.

"This third PPA, signed by SUEZ and a major French Group, demonstrates the benefits of SUEZ's strategy to provide recovered energy to support the industrial sector in its decarbonization efforts. PPAs provide companies with sustainable and secured energy at a fixed price over the long term. This is a new example of our will to support transport operators, such as RATP Group, in their efforts to promote greener, more resilient, and environmentally friendly mobility.", explains **David Lamy, CEO of SUEZ's Recycling and Recovery business in France.**

"Having signed an initial long-term solar energy supply contract in 2022 and benefited from existing wind and hydroelectric power plants since 2021, the RATP Group is taking another step forward in its energy transition by partnering with SUEZ. This collaboration will help the Group achieve its goal of increasing the proportion of renewable energy in its annual electricity consumption to 15% by 2030. By integrating a new form of renewable energy production into its energy mix, RATP Group is demonstrating its

SUEZ, *Société Anonyme*, a company registered under the laws of France, with a share capital of €63,799,880.78, having its seat at: Altiplano, 4, place de la Pyramide - 92800 Puteaux, France, registered number 901 644 989 RCS Nanterre –Tel : +33 (0)1 58 81 20 00 – suez.com – VAT Number: FR60901644989

Press release

commitment to accelerating its energy transition, optimizing its consumption, and increasing its use of renewable energy across its activities.”, said Jean-Yves Leclercq, Director of Strategy, Finance and Sustainable Performance of RATP Group.

About RATP Group:

With more than 13 million trips made every day around the world, the RATP Group is the third largest urban transport operator and a major player in the sector, present in 16 countries on five continents. The Group operates nine modes of transport on a daily basis, including metro, urban and interurban buses, trams, rail, sightseeing tours, cable cars, maritime shuttles, on-demand transport and autonomous vehicles. The Group is also involved in partnerships covering three additional modes of transport: carpooling, car sharing, and bike sharing. Recognized as an expert in infrastructure management and engineering, the Group offers a wide range of related expertise through its specialized subsidiaries, including urban services such as real estate, telecommunications, logistics, new mobility, energy, security, passenger information, ticketing solutions and the development of commercial space in transport areas. In the Île-de-France region, RATP has operated one of the world's densest multimodal networks for 75 years. With over 73,500 employees, a quarter of whom work internationally, the RATP Group designs, implements, and operates innovative mobility solutions and services every day to help create a more sustainable, human-centred city.

About SUEZ:

Faced with growing environmental challenges, SUEZ has been delivering essential services that protect and improve our quality of life for more than 160 years. SUEZ provides its customers with innovative and resilient solutions for water and waste services. With 40 000 employees across 40 countries, the Group works with customers to create value over the full lifecycle of their assets and services, and to drive their low carbon transition. In 2024, SUEZ provided drinking water for 68 million people worldwide and sanitation services for 44 million people. The Group generated 8 TWh of energy from waste and wastewater. In 2024, SUEZ has generated revenues of 9.2 billion euros.
