

Paris, April 29th, 2025

SUEZ and the Gabonese Energy and Water Company (SEEG) have signed a five-year contract to optimize drinking water production and distribution services in Libreville and major cities in Gabon

SUEZ is supporting the Gabonese authorities in improving drinking water services. The €200 million five-year agreement includes a know-how transfer program for SEEG teams and the restoration of the company's financial stability.

Pierre Pauliac, Co-CEO of SUEZ and Chief Operating Officer Water, said: *“Providing essential services to people is at the heart of SUEZ's mission as a major player in environmental services. This contract with SEEG, which will guarantee Gabonese people continuous access to high-quality drinking water, is fully in line with our mission. We are proud to support SEEG in this project, which will have a major impact on the Gabonese population, while helping to strengthen the skills of the teams and boost the local economy. We would like to warmly thank the Gabonese authorities for their trust.”*

A partnership to meet drinking water production and distribution needs

Continuous access to high-quality drinking water remains a crucial issue for the Gabonese population. To meet this challenge, the Gabonese authorities are relying on SUEZ's expertise and technologies to bring water services up to international standards and ensure adequate supply of good quality water to the population.

Under this new contract, SUEZ will work alongside SEEG across all its business lines, including production, transport, distribution, and customer management, namely:

- **Pipe condition analysis**, using SUEZ technologies, for leak detection and repairing, in the Greater Libreville water networks (Libreville, Ntoun and Owendo);
- **Resizing and gradually replacing priority equipment** in inland cities (Port-Gentil, Franceville, Oyem, Lambaréné, Mouila, Tchibanga, Makokou, Ndjolé, Moanda, Bitam, Ndendé, Gamba, Boué, Ngouoni, Lébamba, Okondja, Mékambo, Minvoul, Moabi, Kango, Léconi, etc.), in partnership with Saint Gobain PAM Canalisations, the equipment supplier;
- **Regularization of unsafe overhead connections**, to be replaced with compliant underground connections, installation and replacement of water meters to ensure accurate measuring and billing of water consumption, as well as a fraud prevention system;
- Revision and improvement of water management processes and **modernization of the billing system**.

The agreement also sets up a **know-how transfer program** for SEEG teams, using the WIKTI methodology developed by SUEZ, which assesses individual and collective skills in each business segment to implement tailored and scalable training plans.

Key performance indicators are also included in the contract, including a reduction in water losses in the networks, improved billing efficiency, increased access to water, and skills development for local teams through SEEG's Profession Center (CDM), which will eventually roll out a large-scale training plan.

SUEZ, *Société Anonyme*, a company registered under the laws of France, with a share capital of €63,799,880.78, having its seat at: Altiplano, 4, place de la Pyramide - 92800 Puteaux, France, registered number 901 644 989 RCS Nanterre – Tel : +33 (0)1 58 81 20 00 – suez.com – VAT Number: FR60901644989

Hiring local SMEs for installation work, driving employment and growth

The installation work will be subcontracted to **Gabonese SMEs** from the local ecosystem. SUEZ is committed to supervising and training these companies to ensure the work is carried out in accordance with the Group's standards, particularly in terms of health and safety. The volume of work subcontracted to SMEs will represent a budget of around €60 million.

About SUEZ:

Faced with growing environmental challenges, SUEZ has been delivering essential services that protect and improve our quality of life for more than 160 years. SUEZ provides its customers with innovative and resilient solutions for water and waste services. With 40 000 employees across 40 countries, the Group works with customers to create value over the full lifecycle of their assets and services, and to drive their low carbon transition. In 2024, SUEZ provided drinking water for 68 million people worldwide and sanitation services for 44 million people. The Group generated 8 TWh of energy from waste and wastewater. In 2024, SUEZ has generated revenues of 9.2 billion euros.
