SUEZ RECOGNISED BY THE DOW JONES SUSTAINABILITY INDEX WORLD INDEX FOR THE QUALITY OF ITS OVERALL PERFORMANCE

- **1ST OUT OF ENVIRONMENTAL COMPANIES**
- **3RD IN THE 'MULTI AND WATER UTILITIES' SECTOR**

For the 10th year running, SUEZ has seen its economic, environmental and social performance recognised through its inclusion in the Dow Jones Sustainability Index (DJSI) World index, and was ranked 3rd in the Multi-Utilities sector after two energy companies.

Created in 1999 by S&P Dow Jones Index, in conjunction with RobecoSAM, the DJSI indices assess the 2,500 biggest companies by market capitalisation to find the top-performing 10% of businesses in their sector in terms of corporate social responsibility. A pioneering force in the assessment of businesses' extra-financial performance, these indices have become a key indicator for socially responsible investment.

As further proof of SUEZ's leadership in terms of extra-financial performance, the Group was awarded 'prime' status for 2018 by the Oekom ratings agency, and was also ranked 1st in the Utilities – Water sector in the FTSE4Good index.

Jean-Louis Chaussade, CEO of SUEZ says, *"This recognition bears witness to our performance and our commitment to tackling the great environmental and social challenges of this century. It is a major asset and a clear differentiating factor, but it also highlights the example we set to our industrial and local authority customers, for whom environmental and social excellence is a shared goal."*

About SUEZ

With 90,000 employees around the world, SUEZ is a global leader in smart, sustainable resource management. The Group provides solutions for managing water and waste that help cities and industries optimise the management of their resources and improve their environmental and economic performance while complying with current regulations. SUEZ is wholly committed to the resource revolution to counter the challenges of quality and availability. Building on the potential of digital technology and innovative solutions, the Group is able to recover 19 million tonnes of waste a year and to produce 4.3 million tonnes of secondary raw materials, as well as 6.7 TWh of local renewable energy. It also preserves water resources by providing 63.6 million people with sanitation services and reusing 882 million m³ of waste water. In 2017, SUEZ generated a turnover of €15.9 billion.
