RECYCÂBLES, EUROPEAN LEADER IN THE RECYCLING AND RECOVERY OF CABLES, CONTINUES TO EXPAND

➤ PROJECT TO CREATE A SECOND CRUSHING LINE WILL EXTEND THE SITE'S PROCESSING CAPACITY

In 10 years, RecyCâbles, formed as a joint venture between SUEZ and Nexans in 2008, has become the European leader for cable recycling and recovery. Every year, about 30,000 tonnes of cables are recovered by SUEZ Nord ecopôle in Noyelles-Godault (France). By 2020, the site aims to reach its maximum annual processing capacity of 36,000 tonnes.

The Noyelles-Godault site can process all cable types, from simple to complex, copper or aluminium, and whatever their origin, electrical or telecoms, from demolition or cable waste. In partnership with Nexans, SUEZ has developed advanced technologies that combine a sequence of sorting, cutting and crushing processes making it possible to recover nearly 30,000 tonnes of cables a year to produce of 99.9% pure copper shot for reuse. The products derived through the cable recovery process (copper and aluminium shot, polymers and so on) are then sent to specialised channels, and especially to Nexans, for the manufacture of new cables.

Kamil Beffa, Executive Vice President Europe for Nexans, says: *"Nexans' ten-year alliance with SUEZ through RecyCâbles reflects the Group's commitment to environmental preservation. The Nexans Recycling Services offer is part of this same circular economy approach. By working with committed organizations like SUEZ, and by placing our common expertise at the service of our customers and partners, together we are contributing to building a sustainable future."*

"By 2050, some ores may have been depleted. The creation of a recovery chain for cables and non-ferrous metals allows us to secure resources by producing very high quality secondary raw materials from waste. The SUEZ Group is particularly proud of what has been achieved so far and we aim to continue down this path with Nexans to pursue the development of RecyCâbles. The combined expertise of SUEZ and Nexans has already raised the profile of RecyCâble, both in France and internationally," says Philippe Maillard, Executive Vice President of SUEZ France.

Development levers

Nexans has extended its partnership with SUEZ for the recovery of cables for three years, while also incorporating a significant element of consulting. The RecyCâbles employees are now involved with Nexans at the cable design phase in order to optimise their end-of-service-life and to create, from the very beginning, a circular economy philosophy.

At the same time, RecyCâbles is developing its market share in the telecoms sector, particularly through the volume of cabling systems resulting from the dismantling of obsolete call centers.

Since July 2017, SUEZ and Nexans have also set up a compacting activity near the main Noyelles-Godault factory, with the capacity to compact 600 tonnes of cables and non-ferrous metals a month. The aim is to reach 800 tonnes a month by 2019.

Finally, in July 2019, the processing capacity of the site will be extended by 7,000 tonnes a year through the creation of a second crushing line. This will enable RecyCâbles to adapt to new markets and further its development.

NEXANS

As a global leader in advanced cabling and connectivity solutions, Nexans brings energy to life through an extensive range of best-in-class products and innovative services. For over 120 years, innovation has been the company's hallmark, enabling Nexans to drive a safer, smarter and more efficient future together with its customers. Today, the Nexans Group is committed to facilitating energy transition and supporting the exponential growth of data by empowering its customers in four main business areas: Building & Territories (including utilities, smart grids, mobility), High Voltage & Projects (covering offshore wind farms, submarine interconnections, land high voltage), Telecom & Data (covering data transmission, telecom networks, hyperscale data centers, LAN), and Industry & Solutions (including renewables, transportation, Oil & Gas, automation, and others).

Corporate Social Responsibility is a guiding principle of Nexans' business activities and internal practices. In 2013 Nexans became the first cable provider to create a Foundation supporting sustainable initiatives bringing access to energy to disadvantaged communities worldwide. Nexans employs more than 26,000 people with industrial footprint in 34 countries and commercial activities worldwide. In 2017, the Group generated 6.4 billion euros in sales. Nexans is listed on Euronext Paris, compartment A. For more information, please visit: www.nexans.com

SUEZ

With 90,000 employees spread over the five continents, SUEZ is a worldwide leader in the field of intelligent and sustainable management of resources. We offer solutions dedicated to the management of water and waste, which enable cities and manufacturers to optimise the management of their resources and to improve their environmental and business performances, in compliance with regulatory standards. In order to meet increasing demand and overcome the challenges in terms of quality and lack of resources, SUEZ is fully committed to the resources revolution. By fully exploiting the potential of digital technologies and innovative solutions, the Group processes 17 million tonnes of waste annually and produces 3.9 million tonnes of secondary raw materials and 7 TWh of local renewable energy. It also preserves water resources, providing 58 million inhabitants with sanitation services and recycling 882 million m3 of used water. In 2017, SUEZ achieved sales revenues of €15.9 billion
