SUEZ WINS C. €1 BILLION WASTEWATER TREATMENT CONTRACT IN DONGYING CHEMICAL INDUSTRY PARK IN CHINA

SUEZ NWS wins a contract worth a total amount of c. 1 billion euros over 50 years for centralized wastewater treatment in the Dongying Chemical Industry Park, located in Shandong province, south-east of Beijing. The project will boost local authorities' efforts to better manage water resources and further improve the environment.

SUEZ NWS has formed a joint venture¹ that will be responsible for the investment, construction and operation of the wastewater treatment plant with a capacity of 26,000 m³ per day. The plant will provide centralized treatment of all industrial wastewater streams in Dongying Chemical Industry Park. It will also have the capacity to meet the growing wastewater treatment demand from future park projects.

Dongying is an important oil base in China whose Industry Park hosts key players in the petrochemical industry². In recent years, the Park has striven to become a safe, high-end park in pursuit of green growth. In 2018, the total industrial output value of the Park exceeded RMB 100 billion.

Construction work will begin in late 2019 and be completed by late 2020. The joint venture will be in charge of operating the plant for a period of 48 years. The plant will be equipped with advanced treatment processes ensuring the production of high-quality treated wastewater in compliance with environmental standards in force, and the reuse of 40% of this water to supply the industries of the Park.

Wang Feng, Deputy Secretary of the Dongying District Party Committee and District Head, said: *"We hope that SUEZ NWS will exert its rich experience in the construction, operation and management of wastewater treatment plants in this project to promote the centralized treatment of wastewater in the park and concentrate on emission to effectively improve the district's environment. We also hope that it can improve the efficiency of water use, solve the predicament between industrial water supply and demand, and comprehensively accelerate the park's upgrade."*

"This contract strengthens our presence in Shandong Province and highlights our ambition to develop our activity on the industrial market, at both local and international levels. Since 2002, SUEZ NWS has supported the city of Qingdao in the distribution of drinking water to 2.5 million inhabitants and the management of urban and industrial wastewater. This new show of confidence from local authorities also reaffirms our commitment to supporting industries in their transition to a circular economy and sustainable growth. The Group is already providing its expertise to 13 industrial parks in China, including the Shanghai Chemical Industry Park (SCIP), one of the largest petrochemical facilities in Asia." said Bertrand Camus, CEO of SUEZ.

¹ The joint venture is established between SUEZ NWS (41%), Dongying District Caijin Park Investment Management Co., Ltd. (20%), and Wantong Haixin Holding Group Co., Ltd. (39%)

² Sinopec Shengli Oilfield Petrochemical General Factory, Wantong Group, Haike Group, Shenchi Group, Shandong Longyuan Petroleum Chemical Co.

Signing of the contract for the centralized wastewater treatment in the Dongying Chemical Industry Park with representatives of SUEZ NWS, Wantong Haixin Holding Group Co., Ltd. and Dongying District Caijin Park Investment Management Co., Ltd.

SUEZ

With 90,000 people on the five continents, SUEZ is a world leader in smart and sustainable resource management. We provide water and waste management solutions that enable cities and industries optimize their resource management and strengthen their environmental and economic performances, in line with regulatory standards. To meet increasing demands to overcome resource quality and scarcity challenges, SUEZ is fully engaged in the resource revolution. With the full potential of digital technologies and innovative solutions, the Group treats over 45 million tons of waste a year, produces 4.4 million tons of secondary raw materials and 7.7 TWh of local renewable energy. It also secures water resources, delivering wastewater treatment services to 66 million people and reusing 1.1 billion m³ of wastewater. SUEZ generated total revenues of 17.3 billion euros in 2018.

NWS Holdings Limited

NWS Holdings Limited ("NWS Holdings", Hong Kong stock code: 659) is the infrastructure and service flagship of [New World Development Company Limited](#) (Hong Kong stock code: 17). It has diverse businesses and investments predominantly in Hong Kong and Mainland China, comprising toll roads, environmental management, port and logistics facilities, rail container terminals, commercial aircraft leasing, facilities management, healthcare services, construction and public transport. Please visit www.nws.com.hk for details.

SUEZ NWS Limited

SUEZ NWS Limited ("SUEZ NWS") is a joint venture between SUEZ and NWS Holdings Limited that encompasses our essential business segments – Water Management, Recycling and Waste Recovery and Water Treatment Infrastructure in the Greater China region. With 8,000 employees and over 70 joint ventures with local partners, SUEZ NWS is developing smart and sustainable management of the water cycle, smart water solutions and recycling and waste recovery to help cities and industries optimize water management, recycling and waste recovery. It has built over 260 water and wastewater treatment plants in Greater China, supplying drinking water to 20 million people. It is a leading operator of waste management in Hong Kong and delivers its expertise in the management of environmental services to 13 industrial parks in Mainland China.
