ORGANIX®, THE MARKETPLACE FOR ORGANIC MATERIALS LAUNCHED BY SUEZ, NOW AVAILABLE ON THE WHOLE NATIONAL TERRITORY

Six months after it was launched in a pilot zone in the west of France, Organix®, the digital platform dedicated to organic waste, is extending its offer to the entire French territory. This simple and secure marketplace, the first of its kind in France, puts organic waste producers in touch with the methane producers, who convert this waste into energy.

The results of the first operating months of the Organix® marketplace are very promising with a volume of transactions that meet SUEZ's objectives. In the last few weeks, nearly 8,000 tonnes of biowaste have passed through the platform for the regions of Brittany, Normandy and Pays de la Loire alone.

The items put up for sale on Organix® represent a great variety of flows: grape seeds, waste from cereal production, downgraded or expired food products (glucose, birch sap...). Their producers - agricultural cooperatives and food and beverage manufacturers or pharmaceutical industries for example - have benefited from this innovative digital solution to market their waste in the best possible conditions, on the basis of an auction system like the one used for everyday consumer goods.

By optimizing the links between actors in this market of organic flows, SUEZ is promoting the recovery of waste and the production of new energy and organic resources via local distribution channels, for the benefit of the circular economy. Furthermore, SUEZ's expertise ensures the traceability and regulatory compliance of all these flows.

In light of these encouraging results, SUEZ is now studying the opening of its platform to Belgium.

Organix® awarded at the 2017 Assises des Déchets

Organix® was a winner of the Speed Meetings Innovation competition held by the Assises des Déchets 2017, the national forum on waste management, in the Breakthrough/Digital Technologies category. Organix® has also just been nominated for the Innovation Trophies 2018 held by the CFIA (Carrefour des Fournisseurs de l'Industrie Agroalimentaire), the trade fair for manufacturers in the food processing industry, in the Environment category. SUEZ will be presenting its Organix® solution at the CFIA, to be held in Rennes on 13-15 March 2018.
