## SUEZ WINS A NUMBER OF CONTRACTS IN CHINA AND PHILIPPINES WORTH A TOTAL REVENUE OF MORE THAN 90 MILLION EUROS

**SUEZ pursues its development in Asia, supporting industrial development while protecting the environment:**

**The Group won a number of design, engineering, supply of equipment and technical service contracts for municipal and industrial wastewater treatment worth a total value of c.€91.7millions for municipal and industrial wastewater treatment in Asia.**

### ➤ **Wastewater treatment development contract in Metro Manila**

With a population of more than 13 million inhabitants, **Metro Manila** currently has an ambitious target to increase the household sewerage coverage and subsequent treatment to avoid various health and water pollution issues. SUEZ has been appointed to undertake the design and construction as well as one year of operation and maintenance of the Aglipay Sewage Treatment Plant in Mandaluyong city. With a daily capacity of 60,000 m<sup>3</sup>, it will be the biggest in the country. It will meet stringent national standards exceeding EU requirements to reduce adverse impact on Manila Bay and Pasig River and environmental footprint. Construction is underway and is expected to be completed in early 2024.

### ➤ **A number of projects in China: wastewater treatment equipment and full-process technical services for two chemical parks and the supply of municipal and industrial wastewater treatment equipment and technical services**

In Wanhua Yantai Industrial Park in the Shandong province of China, SUEZ will provide **Wanhua Group**<sup>1</sup>, a Global Top 50 chemical company, with integrated wastewater treatment units and a full-process suite for the tertiary treatment of concentrated wastewater. The process is the result of intensive innovation and allows the client to reuse discharged ozone exhaust gas in the aerated biochemical reactor, which enables waste gas recycling but also significantly improves the efficiency of biochemical treatment. The project is expected to cut COD<sup>2</sup> emissions and reduce carbon emissions by 13,000 tons and 3,930 tons per year respectively, whilst reducing operating costs and electricity consumption by 681,895 kWh every year. This is the third joint project between the two companies following successful collaborations in 2017 and 2018.

At the **Lianyungang Petrochemical Industrial Base**, SUEZ will provide a full-stage water treatment solution, along with equipment and technical services to Shenghong Group<sup>3</sup>, a Fortune 500 company. The project applies SUEZ's "embedded WWTP" concept which helps the refining-chemical integration project to meet the most stringent discharge standards for wastewater treatment in public works. The solution turns waste into resources and will reduce carbon emissions by 8,123 tons a year.

Additionally, SUEZ also signed a series of municipal and industrial wastewater treatment contracts with a combined daily treatment capacity of more than 1 million m<sup>3</sup>. These projects will significantly improve local water quality and wastewater treatment capacity, while enabling the reuse of water and conserving scarce

land resources. Among them, the industrial water treatment facilities can help remove large volumes of suspended solids and polluted elements from wastewater, thus preventing secondary pollution of water bodies.

*“By designing optimal treatment solutions through the implementation of new technologies and innovation, we help customers to improve operational performance, save costs and enhance competitiveness, delivering excellent services. In Asia, where the industries and municipalities are facing increasingly complex regulatory and operational constraints, we look forward to working side by side with local companies to meet future challenges, developing our knowledge and skills, serving the circular economy and protecting the environment. With these new contracts, SUEZ reaffirms its commitment to building a sustainable future through the implementation of its strategic plan Shaping SUEZ 2030”*, concluded Ana Giros, Senior Executive Vice President of SUEZ in charge of the APAC (Asia, Australia and India) and AMECA (Africa, Middle East, Central Asia) Regions.

**Annex:**

These new contracts and references strengthen the Group's positions in Asia. Indeed, it has built more than 600 water and wastewater treatment plants throughout the continent. SUEZ has been providing wastewater treatment and drinking water services to the Philippines since 1961. Recently, it has completed the refurbishment work for a drinking water treatment plant in Santa Barbara, Iloilo City, and is currently building a wastewater treatment plant in Cupang, Muntinlupa City. In Thailand, it is also operating a waste-to-energy and a plastic recycling plant.

**About SUEZ:**

*Since the end of the 19<sup>th</sup> century, SUEZ has built expertise aimed at helping people to constantly improve their quality of life by protecting their health and supporting economic growth. With an active presence on five continents, SUEZ and its 90,000 employees strive to preserve our environment's natural capital: water, soil, and air. SUEZ provides innovative and resilient solutions in water management, waste recovery, site remediation and air treatment, optimizing municipalities' and industries' resource management through "smart" cities and improving their environmental and economic performance. The Group delivers sanitation services to 64 million people and produces 7.1 billion m<sup>3</sup> of drinking water. SUEZ is also a contributor to economic growth, with more than 200,000 jobs created directly and indirectly on an annual basis, and a provider of new resources, with 4.2 million tons of secondary raw materials produced. By 2030, the Group is targeting 100% sustainable solutions, with a positive impact on our environment, health and climate. SUEZ generated total revenue of €18.0 billion in 2019.*

**About SUEZ Asia:**

*With a strong presence of 60+ years in South East Asia and 40+ years in Greater China, SUEZ is a preferred partner in helping authorities and industrial clients develop water and waste management solutions that enable cities and industries to optimise their resource management and strengthen their environment and economic performances. With 9,000+ employees and 70+ joint ventures with local partners, the Group has built 600+ water and wastewater plants, with 32+ million people benefiting from our water and waste services. Today, SUEZ is recognized as one of the most influential companies and a service benchmark in leading the region's environmental industry. We operate China's first PPP water contract in Macau, one of Asia's largest hazardous waste treatment facilities in Shanghai, as well as a plastic recycling plant in Thailand. It is also a leader in Hong Kong's waste management industry and delivers environmental services to 20 industrial parks.*
