

Plastics Recycling

Key figures:

➡ Since 1950,
6.300 Mt
of plastic waste
has been produced.¹

What happens to this waste?

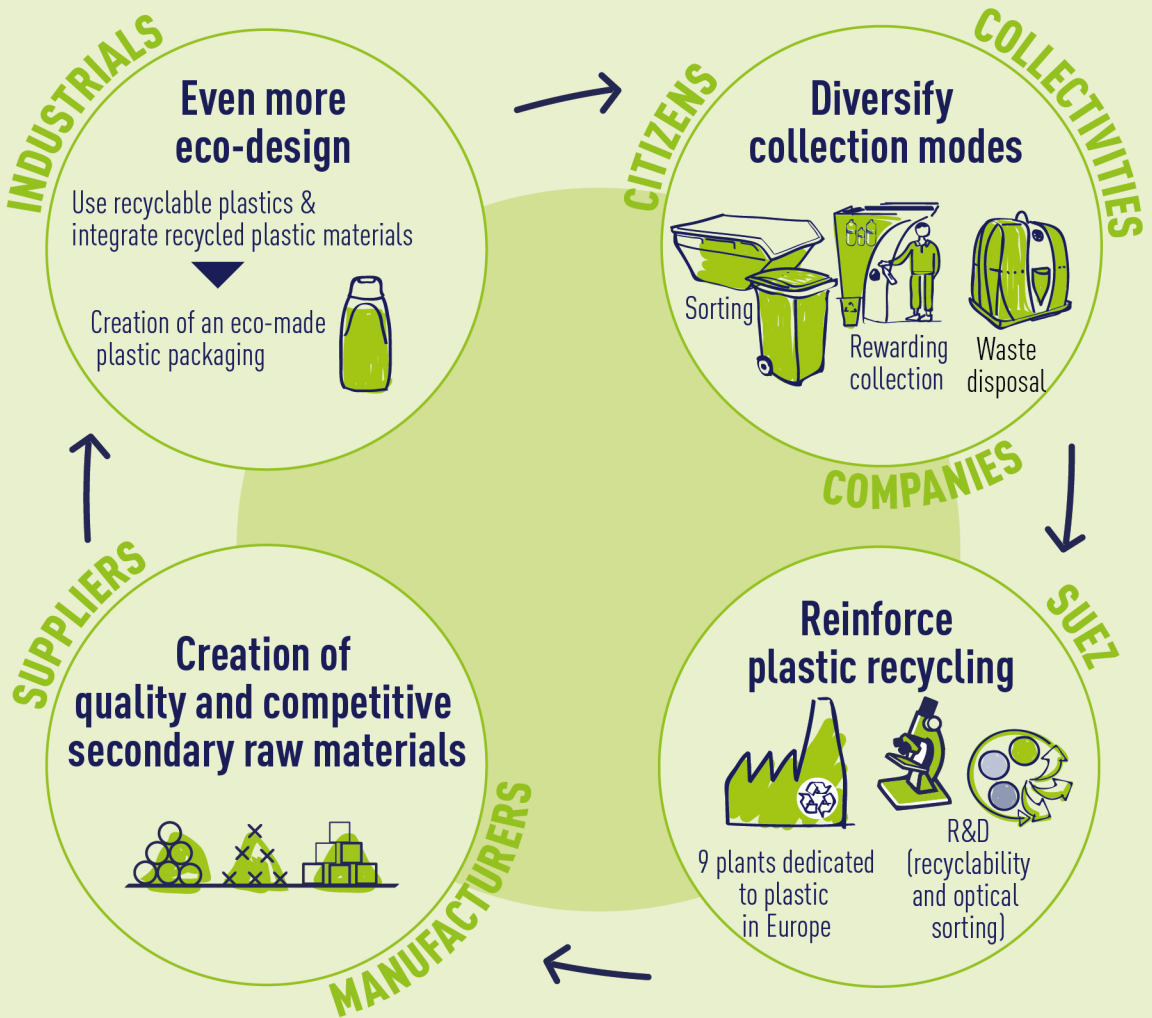

Plastic world production

2016 ➡ **335 Mt**²
2025 ➡ **380 Mt**³
of which **250 Mt**
will end up
in oceans.⁴

How to give a second life to plastic?

Environmental benefits

Our objective: boost the circular economy

+50% of plastic processed volumes by 2020
➡ 600 000 tons
